Executive Summary

MERN Stack Developer with hands-on experience in building scalable and responsive web applications using MongoDB, Express.js, React, and Node.js. Skilled in developing RESTful APIs, implementing authentication systems, and handling dynamic data rendering using modern React hooks. Strong problem-solving abilities with a focus on clean code, performance optimization, and delivering efficient real-world solutions.

Education

R P Sarathy Institute of Technology

Sept 2021 – May 2025

B.Tech Information Technology

- CGPA: 8.1/10.0
- **Coursework:** Web Development, Database Management System, Computer Networks

Experience

MERN Stack - Intern

Coimbatore

GT Software

DEC 2025 – APR 2026

- Developed responsive user interfaces and web applications, including authentication pages and dashboards with modern UI practices.
- Integrated REST APIs and managed dynamic data flow using React hooks for efficient state and lifecycle handling.
- Worked with MongoDB and Mongoose for schema design, CRUD operations, and data querying in full-stack applications.

Projects

E-commerce Website

[ecommerce-expense](#)

- Developed a full-stack e-commerce and expense tracking application using MongoDB, featuring JWT authentication and secure user management.
- Built an expense tracker with data visualization and designed an admin dashboard with role-based access control.
- **Tools Used:** React.js, Node.js, Express.js, MongoDB, Mongoose, JWT, Multer, Recharts, CSS

Studiopro

[gle-studio.vercel.app](#)

- Built a full-stack photography studio platform with secure authentication and role-based admin/user access, along with a complete booking and order system.
- Developed an admin dashboard for managing gallery, staff, and clients with analytics, real-time settings, responsive UI, animations, and file uploads.
- **Tools Used:** React.js, Node.js, Express.js, MongoDB, JWT, Multer, Recharts, CSS

CineVault

[cinevalutzone.netlify.app](#)

- Developed a full-stack cinema booking application with real-time seat selection and dynamic filtering.
- Implemented an interactive seat map with tier-based pricing and live availability tracking.
- **Tools Used:** React, JavaScript, CSS3, LocalStorage, REST APIs

Technologies

Languages: JavaScript

Frameworks: React.js, Node.js, Express.js

Database: MongoDB

Tools: Firebase Authentication, REST API
